1. Company introduction

1.1 Name and intent

Nivya is a planned **Indian fintech company** operating as a **Corporate Mutual Fund Distributor (MFD)** under **AMFI**. The product is a **mobile-first and web** platform for retail investors to **discover, compare, and invest in Regular-plan mutual funds** — with a simple, modern user experience comparable to consumer investing apps, while remaining fully compliant with distributor regulations.

Nivya is **mutual-funds-only**. It does not offer stock broking, F&O, or crypto.

1.2 Problem we address

Problem	Nivya response
Direct-plan apps (Groww, Coin, Kuvera) optimize for lowest TER — no distributor trail	Nivya serves investors who use Regular plans via a transparent AMFI-registered distributor
Traditional distributors (agents, banks) often have weak digital UX	Nivya offers Groww-simple self-serve investing
Research portals (e.g. Star SIP) are tool-heavy , invest flow secondary	Nivya is invest-first : discover → compare → execute in one app
Investors confused about Direct vs Regular	Nivya is clear : Regular plans only; transparent about distributor role and earnings

1.3 Entity status (as of document date)

Item	Status
Legal entity (Pvt Ltd / LLP)	To be incorporated (founder action)
Corporate AMFI ARN	Not yet live — demo uses placeholder ARN-XXXXXX
EUIN (certified employee)	Required before ARN — NISM Series V-A
Hybrid vendor (BSE/NSE rails)	To be selected via RFP
Product	Working prototype + mock BFF in GitHub repo
SEBI RIA (personalized advice)	Not planned for v1 — Phase 2 option

2. Vision, mission, and positioning

2.1 Vision

Make **Regular-plan mutual fund investing** as **simple and transparent** as modern Direct-plan apps — without hiding how distribution works.

2.2 Mission

Build an **AMFI-registered, MF-only** platform where investors **discover and compare** funds with clear data, **review** their portfolio with factual insights, **choose** their investments, and **execute** through Nivya as their corporate distributor.

2.3 Positioning statement (internal)

For retail mutual fund investors in India **who** want a simple digital app (not a bank RM or agent) **and** are investing through **Regular plans, Nivya** is an **MF-only distribution app that** helps you discover, compare, and invest with portfolio clarity **unlike** Direct-only fintechs (no trail / different model) **and** unlike research-heavy portals (invest is secondary), **because** Nivya combines **Groww-level UX** with **honest AMFI distributor transparency**.

2.4 Brand pillars

Pillar	Meaning
MF-only	No stocks, F&O, or product clutter
Clarity	Clear data, clear Regular-plan model, clear ARN/EUIN
You choose	Discovery and comparison — not personalized advice in v1
We execute	Compliant order flow, SID consent, mandates, support

3. Confirmed USP (v1)

3.1 Primary USP (approved direction)

Nivya helps you discover and compare Regular mutual funds with clear data and portfolio insights — you choose, we execute as your AMFI-registered distributor.

3.2 Supporting proof points (product + compliance)

Proof point	How it shows up in product
Discover & compare	Category screener, filters, past returns, expense ratio, riskometer — factual , not “we recommend”
Portfolio insights	Holdings, XIRR, allocation, concentration facts — no buy/sell advice in v1
You choose	User selects fund; no personalized advisory engine until SEBI RIA (Phase 2)
We execute	SIP, lumpsum, redeem, switch; orders tagged with ARN + EUIN
Transparent distributor	AMFI tagline on all surfaces; “How Nivya earns” content; Regular plan badge on funds
MF-only	Single-product app — no cross-sell to unrelated products at launch

3.3 What we do not claim (v1)

- “Best fund for you” / personalized recommendations
- “Predicted returns” or “chance of growth”
- “Zero commission” (Direct-plan pitch)
- “Guaranteed” or indicative performance
- Stock broking or trading features

3.4 Future USP extension (Phase 2 — requires SEBI RIA)

Personalized fund recommendations and portfolio review with **actionable suggestions** — only after **SEBI Investment Adviser** registration and counsel-approved advice/execution separation.

4. Business model and revenue

4.1 Model type

Corporate Mutual Fund Distributor (AMFI ARN) — Hybrid Path B:

- **Nivya builds:** brand, UX, BFF, user data, order orchestration, compliance audit trail
- **Vendor provides (initially):** BSE StAR MF / NSE MF Invest connectivity, KYC modules, mandates, scheme master

See docs/ADR-001-hybrid-architecture.md.

4.2 Plan type

Regular plans only — intentional, for revenue and regulatory clarity.

Plan	Nivya offers?	Nivya revenue
Regular	Yes	Trail commission from AMCs on AUM
Direct	No	None

4.3 Revenue streams

Stream	Description
Primary	Trail commission from AMCs on Regular-plan AUM (ongoing %)
Secondary (future)	Advisory fees if SEBI RIA is added (separate from v1)
Not in v1	Upfront commission, guaranteed-return products, stock broking

4.4 Unit economics (metrics to track)

- Regular-plan **AUM** under Nivya ARN
- **SIP book** size and retention
- **SIP bounce** rate (mandate failures)
- **KYC conversion** (signup → KYC complete → first order)
- **Cost per funded account** (marketing + ops)
- **Trail reconciliation** vs AMC statements (monthly)

5. What Nivya is — and is not

Nivya IS	Nivya IS NOT
AMFI-registered corporate MF distributor (target)	SEBI stock broker
Regular-plan transaction platform	Direct-plan / zero-commission EOP (Groww/Coin/Kuvera model)
Self-serve app — customer invests without a human agent	Agent network / sub-broker platform (optional later)
Distribution — factual discovery, comparison, execution	Personalized investment advice without SEBI RIA (v1)
Trail-commission business from AMCs	Guaranteed or indicative return marketing

6. How operations work (end-to-end)

6.1 Operational flow diagram

6.2 Order lifecycle (production target)

DRAFT → PAYMENT_PENDING / MANDATE_PENDING → SUBMITTED_TO_EXCHANGE
 → ACCEPTED / REJECTED → UNITS_ALLOTTED → COMPLETED (or FAILED)

Every transition logged in **immutable audit trail**.

6.3 Money flow (investor perspective)

1. Investor pays via **payment gateway** (lumpsum) or **eNACH/OTM mandate** (SIP).
2. Funds flow through **prescribed MF transaction rails** — not held by Nivya as discretionary pool.
3. Units credited to investor **folio** at RTA/AMC.
4. Redemption proceeds go to **verified bank account**.

6.4 Commission flow (Nivya perspective)

1. Investor holds **Regular-plan** units tagged with **Nivya ARN + EUIN**.
2. AMC pays **trail commission** to Nivya per empanelment terms.
3. Finance reconciles **monthly** with AMC / vendor reports.

7. Customer journey

7.1 Acquisition → retention

Stage	Customer action	Nivya operation
Awareness	Sees ad, content, referral	Marketing (GTM team) — no guaranteed-return claims
Signup	Phone OTP	Auth service; DPDP consent
KYC	PAN, KRA status	KYC orchestration via vendor/KRA
Discovery	Browse category, screener, compare	Scheme catalog API; factual data only
Consent	Accept SID/KIM for scheme	Consent logged before first investment
Invest	SIP / lumpsum	Order + mandate + payment; ARN/EUIN on payload
Hold	View portfolio, SIP book	Portfolio sync from RTA/exchange
Review	Portfolio insights dashboard	XIRR, allocation, concentration facts
Transact	Redeem / switch / pause SIP	Order API + support if needed
Support	Grievance, failed mandate	Customer support + SEBI SCORES path

7.2 What the customer does not need

- A separate **broker** or **agent** to place each order
- A **Demat account** (SOA/folio model — standard for MF)
- To choose **Direct vs Regular** on Nivya — **Regular only**

8. Internal operating functions

8.1 Function map

Function	Responsibility	Owner (target)
Founder / CEO	Strategy, fundraising, vendor/AMC relationships	Founder
Compliance	ARN, KYD, policies, copy review, AMFI DSC, grievance	Compliance Officer + counsel
Operations	Order exceptions, mandate failures, reconciliation	Ops + vendor
Customer support	Phone, email, in-app help	Support team (pre-launch hire)
Engineering	App, BFF, integrations, security	Engineering team
Product / Design	UX, screener, portfolio insights, roadmap	Product
Finance	Commission reconciliation, vendor payments	Finance / CA
Marketing / GTM	Acquisition, content, brand	Strategy team (current hire)

8.2 Daily / weekly / monthly operations (post-launch)

Cadence	Activity
Daily	Monitor order success rate, KYC failures, mandate bounces, support tickets
Weekly	Scheme master / NAV sync health; vendor SLA review
Monthly	AMC commission reconciliation; compliance copy audit; grievance report
Annual	AMFI Declaration of Self-Certification (DSC)

8.3 Hybrid vendor operations

Nivya remains **accountable to the investor** for UX and compliance presentation; vendor handles exchange API maintenance. **VendorMFAdapter** in codebase allows vendor swap with owned PostgreSQL ledger retained.

9. Product scope (v1 launch)

9.1 In scope (MVP)

Module	Features
Auth	OTP login, session, profile
KYC	PAN, KRA status gate before first order
Discover	Fund list, search, categories, screeener (category, horizon, amount, SIP/lumpsum)
Compare	Scheme facts, past returns, expense, riskometer
Invest	Lumpsum, SIP, redeem, switch (as vendor supports)
Portfolio	Holdings, value, XIRR, allocation
SIPs	SIP book, status, mandate link
Insights	Portfolio health facts (concentration, category mix) — not advice
Compliance	ARN strip, disclaimers, SID consent, EUIN on confirmation
Profile	Bank, mandates, statements (as phased), grievance contact

9.2 Out of scope (v1)

Item	Reason
Stocks, F&O, crypto	Wrong license
Direct plans	No trail revenue; different model
Personalized recommendations	Requires SEBI RIA
"Predictive" return engine	Regulatory risk
Insurance, loans, shop	Off-brand; Star SIP mixes these — Nivya stays MF-only

9.3 Channels

Channel	Priority
Android app	P0 (React Native)
iOS app	P0 (React Native)
Web	P0 (Next.js target; Vite prototype today)

10. Technology and architecture (summary)

Layer	Technology (decided / planned)
Mobile	React Native + TypeScript
Web	React → Next.js
BFF	Node.js (Fastify) → optional NestJS at scale
Database	PostgreSQL + Redis
Vendor	VendorMFAdapter — mock today, production vendor TBD
Monorepo	npm workspaces → Turborepo target

Repo today: prototype `nivya-app.jsx`, `services/api`, `packages/compliance`, `docs/openapi.yaml`, `infra/schema.sql`.

11. Regulatory and compliance operations

11.1 Pre-launch checklist (business)

#	Requirement
1	Incorporate company (Pvt Ltd / LLP)
2	NISM Series V-A → EUIN
3	Corporate ARN + KYD
4	Empanelment with AMCs
5	BSE StAR MF / NSE MF Invest (via vendor or direct)
6	Hybrid vendor contract + UAT credentials
7	Grievance process + SEBI SCORES
8	DPDP privacy policy
9	MF compliance counsel retainer

11.2 Always-on compliance (product + marketing)

- Display **"AMFI-registered Mutual Fund Distributor"** + **live ARN** (font ≥ 12px)
- **EUIN** on every order
- **SID/KIM consent** before first investment per scheme
- Standard MF risk disclaimer
- **No** guaranteed / indicative returns
- **No** personalized advice copy in v1
- **Regular plans only** — clear vs Direct competitors

11.3 Content review process (recommended)

All customer-facing copy (app, web, ads, push) → **Compliance Officer or counsel sign-off** before publish.

12. Competitive landscape (context for strategy team)

Strategy team should expand this section. Summary for alignment:

Competitor type	Examples	Model vs Nivya
Direct / EOP apps	Groww, Coin, Kuvera, ET Money	Opposite — Direct, zero MF trail
Regular research portals	Star SIP	Closer peer — Regular MFD, research-first
National distributors	NJ Wealth, Prudent	Same Regular trail; B2B agent vs Nivya B2C app
Banks	HDFC, ICICI, SBI apps	Regular; weak UX — Nivya opportunity

Nivya wedge: Regular MFD + **invest-first app** + **transparent distributor** + **MF-only**.

13. Go-to-market framework (to be completed by strategy team)

Founders confirm USP; strategy team fills the tables below.

13.1 Target customer segments (draft — validate)

Segment	Hypothesis	Message angle
First-time MF investors	Want simple app, not agent	"Start SIP in minutes — MF-only app"
Existing Regular investors	Frustrated with bank/RM UX	"See portfolio clearly — invest in one app"
SIP-focused savers	Monthly habit	"SIP-first, transparent Regular distributor"
Tier-2/3 digital users	Underserved by English-first Direct apps	Hindi/regional, simple copy (test in research)

13.2 GTM deliverables (strategy team output)

Deliverable	Description	Due
GTM-001	ICP + persona documents (2–3 personas)	TBD
GTM-002	Competitor matrix (10+ players, Regular vs Direct, features, messaging)	TBD
GTM-003	Channel plan (organic, paid, referral, partnerships) + budget range	TBD
GTM-004	Launch phasing (soft beta → public) + KPIs	TBD
GTM-005	Messaging house (hero, proof points, disclaimers)	TBD
GTM-006	Pricing / CAC assumptions vs trail breakeven model	TBD

13.3 KPIs (launch)

KPI	Target (soft launch — to be set by team)
Order success rate	≥ 98%
KYC completion (signup → registered)	≥ 70%
First SIP within 7 days of KYC	TBD
SIP bounce rate	TBD
CAC vs projected trail LTV	TBD

14. Strategy team workstreams and deliverables

Team size: 3 people (competitor analysis, GTM, USP/messaging).

14.1 Workstream A — Competitor analysis

Objective: Map who competes for the same user and how Nivya differs on **Regular MFD + invest-first UX**.

Tasks:

1. Build competitor database (Direct apps, Regular portals, NDs, banks).
2. Compare: plan type, license, UX, discovery, execution, content, app ratings, messaging.
3. Deep dives: **Star SIP, Kuvera, Groww, one bank app, NJ/Prudent retail touchpoint**.
4. SWOT for Nivya vs top 5.
5. **Output:** COMPETITOR-ANALYSIS.md + presentation deck.

14.2 Workstream B — GTM strategy

Objective: Define how Nivya acquires first 1k / 10k funded users post-ARN.

Tasks:

1. Finalize ICP and geographic focus.
2. Channel strategy (content/SEO, paid, influencers — **compliance-safe**).
3. Launch timeline aligned with ARN + vendor UAT.
4. Partnerships (AMC co-marketing, employers — if applicable).
5. Support and grievance readiness plan.
6. **Output:** GTM-STRATEGY.md + 90-day calendar.

14.3 Workstream C — USP and messaging

Objective: Turn confirmed USP into **customer-facing messaging** and **in-app copy framework**.

Tasks:

1. Lock hero tagline variants (A/B list) — compliance review list.
2. “How Nivya earns” / Direct vs Regular explainer (transparent distributor story).
3. Feature naming: **Fund screener**, **Portfolio insights** (avoid “recommendation”).
4. Disclaimer library (app footer, order sheet, marketing).
5. **Output:** BRAND-MESSAGING-GUIDE.md + copy doc for app screens.

14.4 Cross-team sync

Meeting	Frequency	Purpose
Strategy standup	Weekly	Progress on A/B/C deliverables
Founder review	Bi-weekly	Decisions on ICP, GTM spend, messaging
Compliance review	Before any public copy goes live	Counsel sign-off

15. Roadmap phases

Phase	Timeline	Business	Product
0 — Foundation	Weeks 1–8	Incorporate, NISM/EUIN, ARN apply, vendor RFP	Prototype  , BFF mock 
1 — Market access	Weeks 6–14	ARN live, AMC empanelment, UAT credentials	Vendor adapter UAT
2 — MVP	Weeks 10–22	Compliance live, support hired	Auth, KYC, screener, orders, portfolio
3 — Mobile + harden	Weeks 18–28	Security audit	RN iOS/Android store beta
4 — Soft launch	Weeks 26–30	50–200 user beta	Real orders, KPI monitoring
5 — Public launch	Week 30+	Marketing scale	App stores + web public
6 — RIA (optional)	Post-launch	SEBI RIA if approved	Personalized recommendations

16. Open decisions and assumptions**16.1 Decisions required**

#	Decision	Options	Owner
1	Legal entity	Pvt Ltd / LLP	Founder + CA
2	Hybrid vendor	RFP shortlist	Founder + engineering
3	Primary exchange rail	BSE first / NSE first	Compliance + vendor
4	First launch geography	Pan-India / focus states	Strategy team
5	Hindi/regional v1	Yes / Phase 2	Product + GTM
6	SEBI RIA timeline	Year 1 / Year 2 / No	Founder + counsel

16.2 Assumptions (documented)

- Nivya remains **Regular-only** for v1 revenue model.
 - **No personalized advice** in v1 without RIA.
 - **Hybrid vendor** signed by Phase 1.
 - **React Native** for mobile per ADR-001.
 - Trail commission is **primary revenue** for first 24 months.
-

17. Glossary

Term	Definition
AMFI	Association of Mutual Funds in India
ARN	AMFI Registration Number (entity distributor ID)
EUIN	Employee Unique Identification Number (on each transaction)
MFD	Mutual Fund Distributor
Regular plan	MF plan with distributor commission embedded in TER
Direct plan	MF plan without distributor commission — lower TER
Trail commission	Ongoing AMC payment to distributor on Regular AUM
BSE StAR MF	BSE mutual fund transaction platform
NSE MF Invest	NSE mutual fund transaction platform
RTA	Registrar and Transfer Agent (CAMS, KFinTech)
KRA	KYC Registration Agency
SID / KIM	Scheme Information Document / Key Information Memorandum
SIP	Systematic Investment Plan
BFF	Backend-for-frontend API layer
RIA	SEBI Registered Investment Adviser
EOP	SEBI Execution-Only Platform (Direct plans)
AUM	Assets Under Management

Document control

Version	Date	Author	Changes
1.0	22 Jun 2026	Nivya / founder brief	Initial company intro & operations outline; USP v1 locked

Next updates: Strategy team to attach deliverables (§14) and fill GTM tables (§13).

End of document.
